

CORBETT CARES
4-H Club

Our club's focus is learning and teaching sustainability topics and performing related community service projects.

COLLECT PLASTIC LIDS INSTEAD OF THROWING THEM AWAY!

We are collecting these caps:

Please do not bring these:

LOOK FOR OUR CORBETT CARES 4H COLLECTION BOXES

There is a collection box in the grade school lobby. Please have your teacher contact us if you want one in your class!

WE CAN ALL MAKE A DIFFERENCE!

FACT: We can all do something to help reduce plastic pollution by making sure we reduce consumption, reuse as much as possible, recycle everything we can and remove hard to recycle items from our garbage cans and get them to the appropriate recycling centers or collection points.

Corbett Cares 4H Club will take these collected lids and caps to a collection center to be recycled and used again in things like playground equipment.

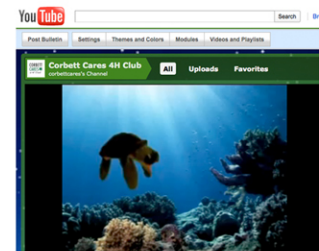

FACT: 70-100% of North Pacific sea birds are affected by eating plastic. Many birds starve to death because they eat too much plastic trash, including plastic caps and lids.

FACT: 100 million marine mammals like Sea Turtles in the North Pacific are killed every year by plastic in the ocean! We can make a difference. About 100 million tons of plastic are in our oceans around the world. It is expected that another 60 billion pounds will be produced this year alone.

FACT: We can all make a difference! Thanks for your help diverting these hard to recycle "rigid plastics" from our landfills, waterways and oceans!
